HyperDeck Studio HD Plus

HyperDeck Studio HD Plus includes all the features of the Mini model, but is larger so it has more space for extra controls and extra connections. This model adds 6G-SDI so it can record and playback ProRes up to Ultra HD 30fps, and it includes an SDI loop out and HDR support. Plus the two 6G-SDI outputs allow fill and key playback up to 1080p60. There is also an HDMI input and a dedicated 3G-SDI monitoring output with overlays. Any button pushed on the front panel is sent to a dedicated RS-422 remote output and the DC power is now a broadcast style XLR connector. The front panel is also upgraded with better transport control buttons, a headphone socket and built in speaker.
